

## Comprehensive Recovery Support

Don't let surgery or injury get you down. Give your body the nutrients it needs to address every aspect of recovery so you can get back on your feet and on with your life.

- Our most comprehensive program. Ideal for surgical procedures or those with impaired wound healing; especially smokers, diabetics or recent corticosteroid users.
- *Clinical Support Morning Formula* supports energy levels in the day. *Clinical Support Evening Formula* supports rest and relaxation in the evening. The use of divided dosing ensures optimal absorption of vitamin C and the B-complex.
- Elevated levels of vitamins, minerals, bioflavonoids and antioxidants promote wound healing and tissue growth repair, boost immune system function and deactivate unstable free-radicals.
- High levels of the B-Complex - the “anti-stress” vitamins - counteract stress during the surgical period.
- *Bromelain with Quercetin* blocks selected pro-inflammatory metabolites and inhibits the manufacture and release of histamine and other allergic/inflammatory mediators.
- Homeopathic *Arnica Montana 30X* reduces bruising, swelling and pain associated with soft tissue injury.
- Excludes vitamin E and other herbals which can cause problems in the peri-operative period and should be avoided.
- Enclosed instructional sheet guides you through every step of the healing process to speed your recovery.

**Directions:** Refer to instructional card enclosed with product kit.
